TRAUMA-INFORMED TRANSITION TRAINING FOR KINSHIP

Every child in care experiences a minimum of two transitions: Entering care and moving out of care.

Caregivers trained in creating trauma-informed transitions can improve the outcomes for children and youth.

In this training series, you will connect with your peers in a dedicated online community as you explore strategies for successful transitions.

This training includes key topics organized over the following four units that focus on preparing children and their caregivers for trauma-informed transitions: Grief and Loss, Relationships, Trauma, and Advocacy.

Created in collaboration with Dr. Jo Axe and Royal Roads University.
